PROFILE

Frontend developer building interactive, production-ready interfaces with React, TypeScript and Next.js. Currently writing frontend at Liha Yunaited. Five public projects shipped — from landing pages built pixel-accurately from mockups to a full e-commerce storefront with client-side routing, global state and a persisted cart. Alongside frontend I build practical AI automations — n8n workflows and LLM-backed pipelines — that remove repetitive manual work. Formal background in cybersecurity and computer systems; currently deepening backend to work full-stack.

EXPERIENCE & EDUCATION

2026 – Present	Junior Frontend Developer Liha Yunaited LLC
2023	Internship on a development team Six months working in a real team under a team lead
2019–2022	Bachelor's, Cybersecurity Chernihiv National University of Technology · diploma issued 30.06.2022
2015–2019	Junior Specialist, Computer Systems & Networks College of Transport & Computer Technologies (CTCT, ChNTU) · diploma issued 30.06.2019
until 2015	General Secondary Education School No. 19, Chernihiv

SELECTED PROJECTS

Nice Gadgets React · TypeScript · SCSS · Zustand
 E-commerce storefront: catalogue with filtering, sorting and pagination, product pages with galleries and colour/capacity switching, cart and favourites in global state.

zubkovskiy.github.io/react_phone-catalog

MyBike HTML · SCSS
 Pixel-accurate landing page from a mockup: fluid grid from 320px, burger-menu navigation, validated contact form.

zubkovskiy.github.io/layout_landing-page

Hoobank HTML · CSS
 Fintech marketing site with a dark gradient system: statistics band, feature and testimonial sections, partner logo grid.

zubkovskiy.github.io/Portfolio/projects/Hoobank

Auto Express HTML · CSS · jQuery
 Commercial landing for a car import service: service walkthrough, carousel, lightbox gallery, lead form.

zubkovskiy.github.io/Portfolio/projects/AutoExpress

Xiaomi Himo HTML · CSS
 Product landing for an electric bike: specification blocks, feature breakdown, image slider.

Full-Stack Developer

In progress — frontend track finished, backend under way

CAREER OBJECTIVE

I do my best work on teams that share knowledge and give honest feedback. Looking for frontend or full-stack work where I can own real features end to end, learn from stronger engineers and grow into wider ownership — full-time, remote or freelance.
